-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1a. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-4 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Pfefferle (US 4,407,785).

Pfefferle discloses a monolith reactor comprising a housing, plurality of monoliths positioned within the reactor, means for supporting the reactor, and means for maintaining compression to the monoliths (col. 3, lines 54-64, col. 4, lines 35-37). The monoliths are honeycomb structure having channels extending there through parallel to a longitudinal axis of the housing. The retainers (26,27) used to urge against the upper and lower stack of monoliths.

Allowable Subject Matter

2. Claims 5-14 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

3. Applicant's arguments filed 11/04/05 (Appeal Brief) have been fully considered but they are not persuasive.

As to claims 1-4 and 15, applicant argues that there is no mean for maintaining the plurality of monoliths under virtually constant compression. Examiner respectfully disagrees, since the retainers are being compress between the monoliths as shown in figure 1.
